Dear Sirs,

in compliance with Enel Global Standard GSCG002, rev. 2 of 23/01/2018, we hereby inform you that the Technical Conformity Assessment (TCA) process for the components listed in the attached table has been completed successfully, according to the requirements of Enel technical specifications.

The identification codes of the equipment subject of this TCA, are listed in the attached table.

We hereby remind you that all the product documentation, according to the procedure described in the Enel Global Standard GSCG002, must be held in your factory and showed on request of our representatives.

The components you will supply shall comply with the product documentation, otherwise the conformity will be withdrawn. Furthermore, any modification of the products shall be approved by us in advance. In such case, according to Enel Global Standard GSCG002, a new Technical Conformity Assessment process shall be requested.

For any communication or information about this TCA please refer to "Enel Verifier" and "Enel Technical Referent" listed in the attached table for each material code.

Best regards.

FABIO GIAMMANCO
